

Coinco Innovation Introduces
**3 New Electronic
Products with
\$1.00 Coin Capability**

Here they are:

1. Coinco's ALL NEW, \$1 Coin, Electronic, 9900 Series Changer.
2. Coinco's Low-Cost, \$1 Coin Electronic Conversion Kit. Fits all Coinco Noryl Changers.
3. Coinco's S150-9480B... the *Lowest Cost*, New Electronic Changer with \$1 Coin Capability.

1

**Coinco's
9900 Series
\$1.00 Coin
Changer**

**Completely Electronic, Single
Price, 4-Price or Multiprice**

- All new product of Coinco research.
- Latest in state-of-the-art electronics.
- Electronic coin detection (accepting and crediting), plus optional "Slug Eater" feature.
- Full escrow on the \$1 Coin — up to 3 at a time.
- Accepts U.S. (and Canadian) nickels, dimes and quarters, PLUS the Susan B. Anthony dollar.
- Up to \$3.00 vend pricing in 5¢ increments.
- Self-loading, 5¢-10¢-25¢ change tubes.

Coin Acceptors worked closely with the Federal government in advising them about technical requirements for the new \$1.00 Coin. Coinco then dedicated its technical know-how to serving vending industry needs after the new \$1.00 Coin would become a reality. We developed a totally new electronic technology for coin equipment, as exemplified by these 3 new types of \$1.00 Coin units.

Coinco's \$1.00 Coin Conversion Kit

Add \$1 Coin Capability — when you need it — to *any* existing Coinco Changer made of Noryl

- Converts every Coinco Noryl Changer ever made to full \$1 Coin Capability.
- Uses same new technology developed for Coinco's completely electronic 9900 Series Changer.
- LOW PRICE.
- Accepts U.S. (and Canadian) nickels, dimes and quarters, in addition to the new U.S. \$1 coin.
- All the reliability of your old Coinco Changer PLUS improved, simplified electronics.
- Uses Coinco's superior "Rustless and Adjustless" Acceptor for separation and slug protection
- New equipment warranty.

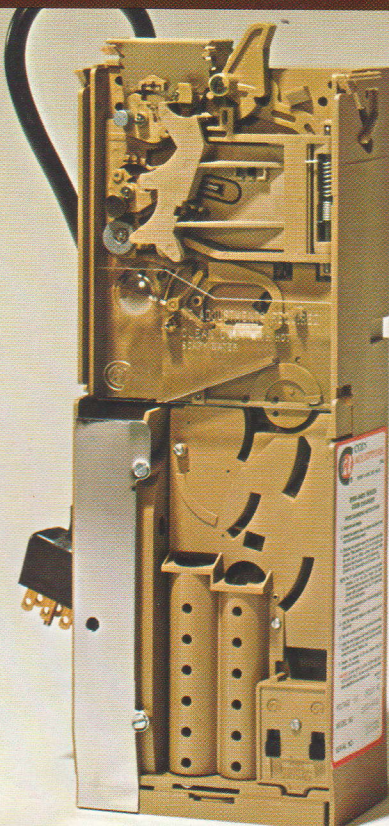

3

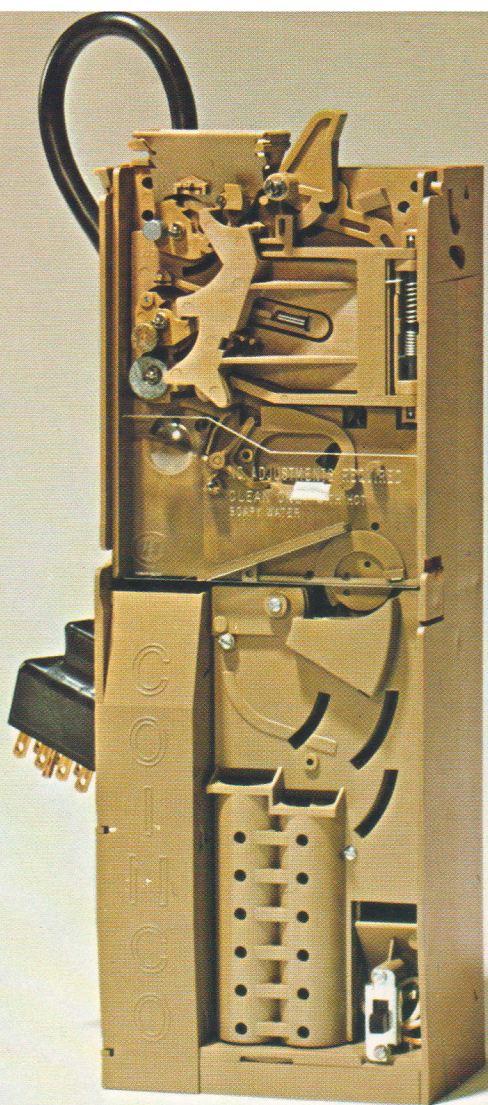

Coinco's S150-9480B The LOWEST COST, NEW CHANGER with \$1.00 Coin Capability

For vending operators who need *new* changers *now*, and want \$1.00 Coin Capability *now*, but not all the features of the completely

electronic 9900 Series Changer. For just a few dollars more than the new, improved Coinco S75-9800B Changer, you can have all new \$1.00 Coin Capability factory installed — now. Includes all the advantages listed with the \$1.00 Conversion Kit above, including Coinco's 2 year electronics warranty. Many parts are interchangeable with Coinco Changers now in use.

Coinco's S75-9800B will remain a safe, usable changer for years to come. It's today's answer to today's needs. And...it can be your low cost \$1.00 Coin mechanism at some future date—when you *need* it.

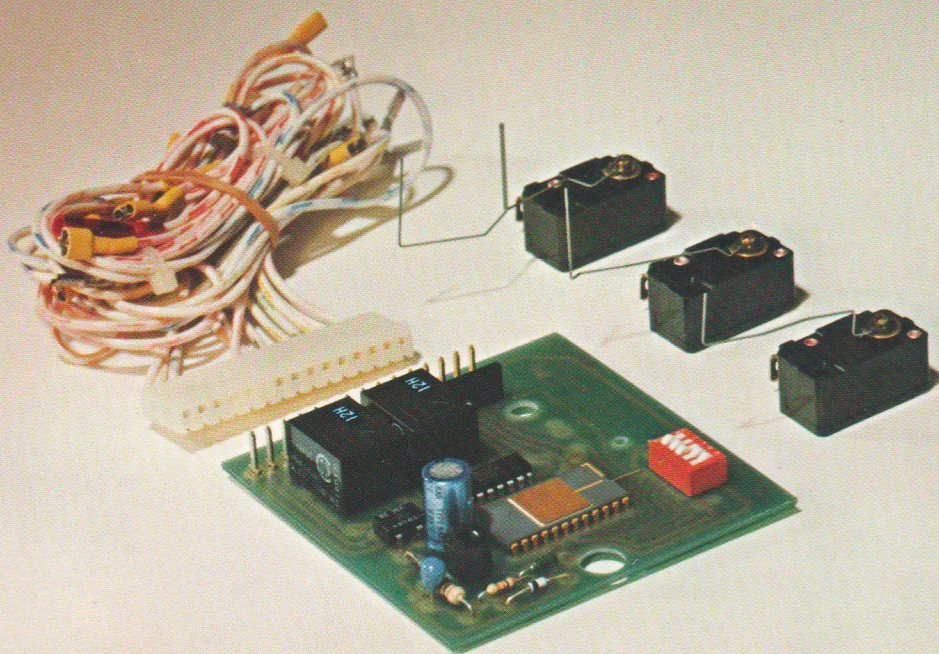

NEW, Simplified, Electronic, Single Price Changer...

The S75-9800B offers unlimited pricing up to \$1.50 in 5¢ increments. Accepts 5¢-10¢-25¢ coins. Convertible to \$1.00 Coin Capability ANYTIME you need it!

PLUS:

- New, electronic technology developed for the 9900 Series Changer.
- Simple, Electronic Logic, for Extra Reliability...just 15 components.
- Logic Boards can be repaired in your own workshop without electronics experience.
- Greatly improved resistance to damage caused by liquids or moisture.
- LOW COST.

"Here's a wise choice for today's operator who needs new changers, but is unsure of his need for \$1.00 Coin units."

How to turn your old Coinco Changers into "New" S75-9800B Electronic Changers For the 1980's

- New Electronic Conversion Kit fits every old Coinco Changer ever made—either metal or Noryl.
- You get unlimited pricing up to \$1.50 in 5¢ increments.
- 29 Coinco Service Centers will install the Kit now.
- Includes simplified Electronic Logic Board.
- Fix-it-yourself, without electronic experience.

Here's how to put familiar old Coinco changers back into service... while adding all the proven benefits of 1980 Coinco electronics.

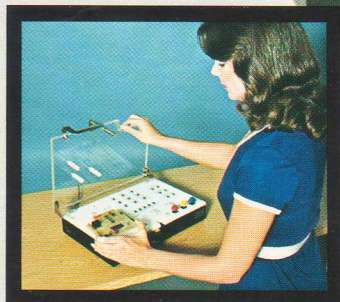

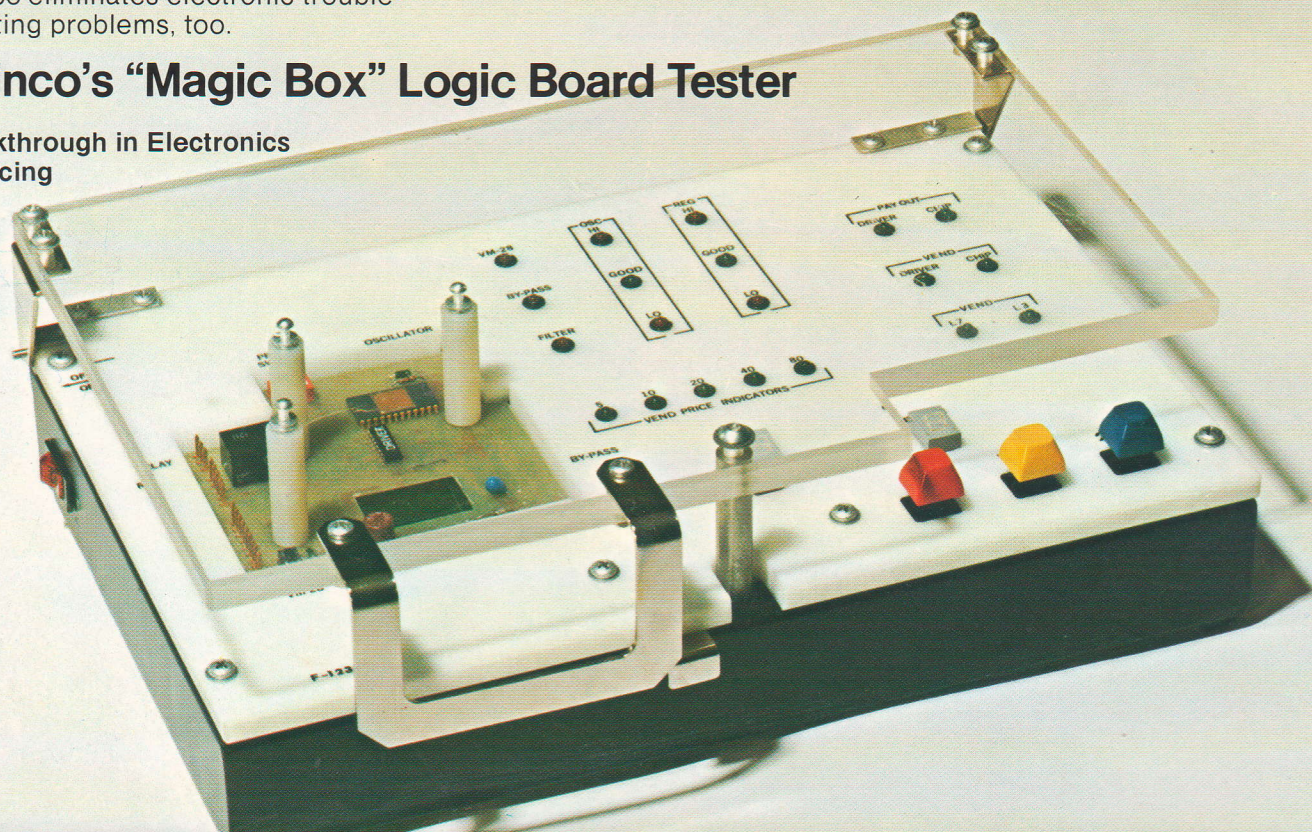

Coin Acceptors, Inc., St. Louis, Missouri 63110

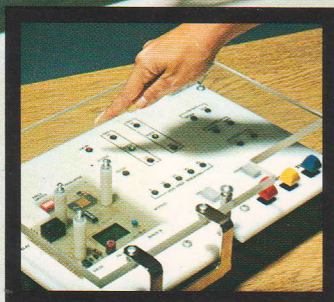

Coinco eliminated coin equipment problems with electronics... Now Coinco eliminates electronic trouble-shooting problems, too.

Coinco's "Magic Box" Logic Board Tester

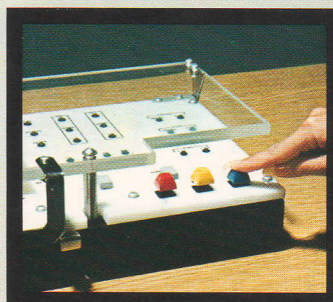

Breakthrough in Electronics Servicing

Place S75-9800B Logic Board in receiver slot. Closing cover makes all electronic testing contacts.

All components except "vend" and "changemaking" are automatically tested and indicated. Red light shows which component needs replacing. Green lights indicate properly operating circuits.

Then, press coin switch input buttons to test "vend" and "changemaking" circuits. Total elapsed time thus far: 13.5 seconds.

Now simply replace the malfunctioning component. No need to consult technicians. No need to send logic board to factory for analysis. Coinco's "Magic Box" Tester does it all.

It finds the bad component immediately ... so you can replace it in minutes. In your own shop. No experts needed.

Coinco's NEW "Magic Box" S75-9800B Logic Board Tester:

- IT'S SIMPLE... You no longer need a skilled technician to troubleshoot S75-9800B logic boards.
- IT'S FAST... Just press the buttons. All faulty components are identified **instantly** by red lights. Green lights indicate properly functioning components. Test takes 10-15 seconds.
- IT'S CONVENIENT... Once you know the problem, it's easy to repair your units, right in your own shop. No need to rely on

distant repair centers. No delays in transit.

- IT'S PROFITABLE... You have less downtime. You have less capital tied up in spare logic boards. No skilled technicians required (just to service electronics). Owner has complete control again.
