Get a bigger piece of the pie.

Without spending a lot of dough.

The Polyvend 2210 is the clear choice for vending operators who want to grow.

Equipment costs keep rising. Traditional vending markets keep shrinking. And you may be wondering if your dreams of growth are just pie in the sky.

Polyvend has good news for you. The vending pie is actually bigger than ever. The market is simply shifting away from the blue collar sector, toward white collar. From the factory to the office. There are over a million untapped potential locations. All you need is the right machine.

The Polyvend 2210 is that machine. It's compact enough to fit comfortably on a break room counter. It's economically priced. Yet it has all the features of a large-capacity glassfront snack machine. And it will pay for itself with just a few sales per day.

Pie-in-the-sky dreaming, or innovative reality? With Polyvend, the choice is clear. And the sky's the limit.

- Glass top and front product display
- FIFO product rotation
- Electronic multi-pricing
- Change maker
- LED readout
- 10 selections
- 120-item capacity
- Easy product loading
- Economically priced for a small location

Polyvend®

The Choice Is Clear.

TELEX NO.: POLYVEND CONA 536-237

July 22, 1986

Dear Operator:

If you are looking for big glassfront features in a small, affordable table top vending machine, Polyvend has the answer! The Polyvend 2210 gives you all the merchandising power and features of the big glassfronts plus it makes change.

We have designed the Polyvend 2210 to encourage the highest possible sales volume in locations that previously could not justify snack vending. Now you can enhance those locations having only coffee service and create snack sales. The Polyvend 2210 can generate new growth for your business and allow you to tap the growing white collar market.

The Polyvend 2210 will be exhibited at the NCSA Show in Nashville, TN from July 31 to August 2, 1986. Make it a point to visit the Polyvend booth and see what this new entry in our glassfront line can do for your business.

The choice is clear for Vending and OCS operators who want to grow. Give your Polyvend representative a call or dial 1-800-643-8250 and let us demonstrate how the Polyvend 2210 can pay for itself with just a few sales per day.

Sincerely,

POLYVEND, INC.
