

airball™

Players think it's fascinating magic • "Look at the ball up there! Now watch, I'll move it back . . . a little higher . . . over to the right . . . It's through! Hey, I made *Champ!*" • Players score by guiding an invisibly suspended ball through brilliant targets glowing with black-light.

With a puff of air • Behind the seeming magic, the **airball** is simplicity itself. • We've taken a ball, supported it on a column of air, given the player control of the ball's direction and height and challenging targets to move through.

Bonus time and sound effects • Maneuvering the ball through five targets wins Bonus time. Scoring five again in the time remaining wins Super Bonus. • The airflow is accompanied by a whistle; a chime rings for each target scored and a warble sounds for Bonuses earned.

Magic for the player is money for you • Thoroughly field-tested, the **airball** has proved captivating for all ages. Everyone wants to make *Champ!* • The absolute reliability of all its components, its compact size and attractive cabinet make the **airball** suitable for any location.

Ninety day warranty. Height 63½"; Width 24"; Depth 36"; with optional seat 61"; Weight 200 lbs.
