**MICKEY ANDERSON AMUSEMENT CO.**  
MICKEY ANDERSON VENDING  
Coin Operated Amusement Machines  
314 East 11th Street  
Phone 452-3207      ERIE, PENNA.

CONTROLS ARE CLEARLY LABELED AND EASY TO USE — Score is totaled on ELECTRONIC READOUT TUBES.

## HOW COMPUTER QUIZ WORKS--AND PRODUCES

**Simple, Fast Operation.** Play is begun by two nickels, a dime or a quarter (three games for a quarter). The player selects his favorite category and four questions appear on the screen, one at a time, along with five multiple-choice answers.

**Exciting Player Action.** Player involvement is heightened as question score ticks down with time. When the correct answer button is pushed, the player is instantly rewarded with a flash of the green "correct" light, and a distinctive "ding-ding" of the bell. If the wrong answer button is pushed, the red "incorrect" light flashes and the player is allowed another try. After each question the player is given "correct answer feedback" to make Computer Quiz an authentic educational device.

**"Genius" Rating Incentive.** A score of 700 earns the player a chance to try for Genius with four additional questions. A sufficient score on this test earns the rating of Genius for the player — and who can resist just one more try for Genius!

**Entertains Waiting Customers.** Computer Quiz is an entertaining and profitable way to keep waiting customers occupied — ideal for busy bowling alleys, billiard parlors or transportation terminals — any location that wants to convert idle time into profitable time.

## THE UNIQUE ADVANTAGES OF COMPUTER QUIZ

**Quality Image — New Markets.** The warm simulated-walnut exterior, the rich blue face panel, and the very nature of the game itself all combine to give Computer Quiz an image unmatched by any other amusement device — an image that allows Computer Quiz to fit in and to perform well where no other amusement machine would be acceptable.

**Big Profits — Small Size.** Computer Quiz measures only two feet from front to back (overall dimensions: 30" wide x 24" deep x 49" high; shipping wt. 135 lbs.) It can be used in locations where space is at a premium, or set up in small areas that are otherwise unusable, where "dead space" can be converted into revenue-producing activity.

**Programming Support — Random Display.** Each program contains over 2500 questions, and the

questions are displayed in random sequence on the screen to insure that no two games are exactly alike. Each program is professionally written by the staff of Nutting Associates working in conjunction with specialists in various fields at Stanford University, and a selection of up-to-date programs is available to every Computer Quiz representative.

**Easy Maintenance — Factory Support.** Electronic components are on plug-in modules, each of which can be easily replaced by the serviceman and sent to the factory for repair — spare parts, repair manuals and professional training are all readily available from the factory.

**NOW IS THE TIME!** Computer Quiz can be your chance to profit from the knowledge explosion. Find out more today!
