50"

## GAME PLAY DESCRIPTION

**DAYTONA USA.** A state-of-the-art, high speed, real-time 3-D, CG race simulator that the world has been waiting for. Daytona USA features sophisticated "Virtual Reality" graphics like you have never seen before.

Scores of eye-catching, colorful racing machines in a double file column are off to a rolling start, roaring off into a 300 MPH high speed race. Players experience realistic detailed representation of the actual Daytona Oval Race Track Course for the beginner, Grand Canyon Course for the intermediate player and, for experts, the Seaside Course. Daytona USA will have you run through neck-and-neck competition with up to eight people on the track while the Daytona USA high quality 50 inch monitor reflects every powerful move you make. A V.R. Button allows you to alternate the four different visual perspectives, and gives you the ultimate speed sensation while new mechanisms let you enjoy the realistic sensation of drifting, actual steering weight and kickback.

\* Also available in 2 Player Twin Model
