Rush to action

On-board life monitors

Realistic, 360-degree virtual world environment

Become an Emergency Medical Technician, in Sega's latest **Real Life Career Series** game, **Emergency Call Ambulance**. Day or night, you're on the call! Race to the scene of a serious traffic accident, spectacular fire or senseless act of big city violence. Your mission, get the injured to the hospital emergency room as quickly and *safely* as possible!

Players are kept aware of their patient's condition by monitoring their Health Point Indicator. Reckless driving or hitting other vehicles will dramatically reduce your patients Health Point Indicator. Follow the on-screen directions or choose your own route. The game ends if the Health Point Indicator reaches zero before you deliver the patient to the hospital. Make it in time, and you're off to the next emergency call!
