Standard model:
78"H x 32"W x 85"D
Power consumption: 300 watts

Grand Prix Racing Realism
Make room for the ultimate, hi-tech linkable motorcycle racing video game available. 500GP is the real thing. Race against real Grand Prix riders. Race on real Grand Prix courses.

So real you have to fight the wind.
500GP is the first motorcycle racing game that senses the rider's position and calculates the wind resistance. When the player leans over the gas tank their potential speed increases. This technique gives the racer the edge that just might put them in first place!

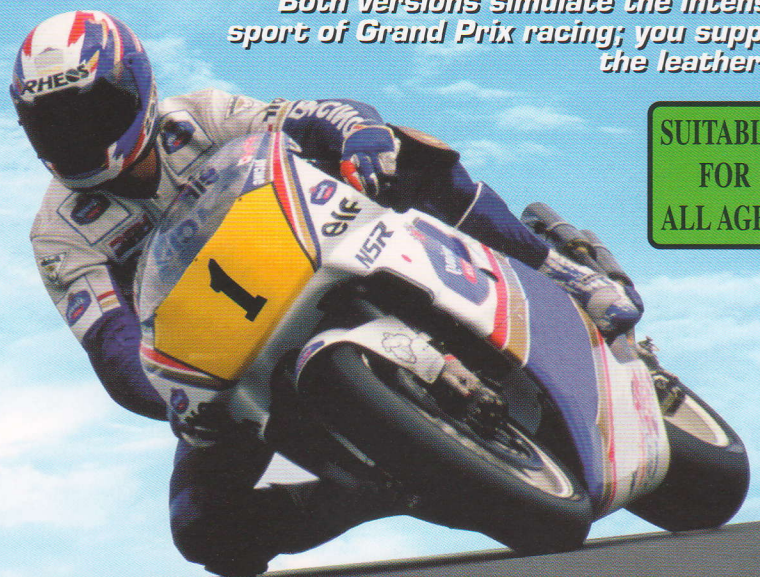

500GP is available in two models:

The deluxe version boasts a 50" monitor, the most authentic bike ever created and attention-grabbing cabinet and graphics.

The standard cabinet packs all the excitement of the deluxe in a compact more affordable package.

Both versions simulate the intense sport of Grand Prix racing; you supply the leathers.

SUITABLE
FOR
ALL AGES

Multiple viewpoints

Three racecourses:

Susuka in Japan
Paul Richard in France
Jerez in Spain

Three top performance motorcycles:
