

THRILLS ON A GRAND SCALE WITH

HELI-SHOOTER

Size: W 122 × D 225 × H 175cm
Cabinet: Durable polyester panels

SEGA

HELI-SHOOTER

Sit in a simulated helicopter cockpit and maneuver through enemy skies. Push control stick forward to speed up and pull back to slow down. Swerve to left or right by depressing the left or right foot pedals and guide the helicopter to avoid enemy missiles.

The wide screen gives a true impression of peering through the cockpit bubble. Enemy territory is visible below with airports, harbors and various structures dotting the landscape.

Zero in on the enemy targets marked in red and launch your missile by depressing the firing button on the control stick. Watch your missile streak towards the target with a burst of yellow flame. Its a direct hit! The target explodes with a roar in a burst of flame.

FEATURES

- * SEGA has succeeded in projecting a true-to-life 3 dimensional image onto the screen.
 - * Sound effects are heightened with a combination of 6 different sounds.
- Simple to assemble and disassemble for ease in transportation.
- * The use of a CPU assures simple control and maintenance.
 - * Score 500 points by hitting the fighter planes on the runway or 200 points for the other targets.
 - * Timer is freely adjustable from 60 to 90 seconds.
