

MC5[®] SERIES

Product Information

MARS ELECTRONICS[®]

Coin Changers/Four and Ten Price

MARS ELECTRONICS[®] MC5[®] Coin Changers offer total versatility and proven reliability for your four and ten price vending applications.

- Fully electronic coin acceptance and credit accumulation
 - Proven reliability in years of rugged field use
 - A wide range of options—switch programmable
 - Plug-in capability for accessories
-

Accepts nickels, dimes, quarters and dollar coins. Mars MC5® Changers have a switch that allows you to accept or reject dollar coins—for today's needs as well as tomorrow's.

Programmable Options allow you to customize the changer for your specific requirements.

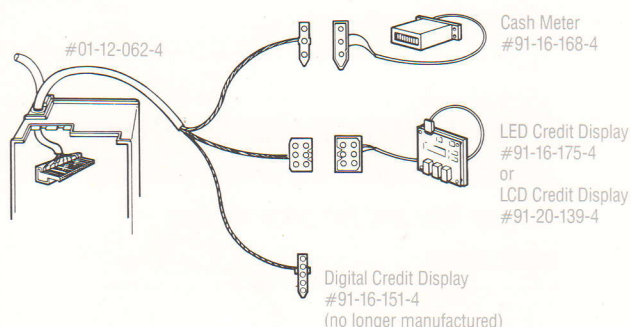

- Canadian/U.S. or U.S. coins only
- Accept or reject dollar coins
- 6 or 66 quarter change storage

Electronic coin recognition—There are no moving parts in the acceptor so coins can't jam.

Inflation-proof vend pricing from 5¢ to \$6.35 in 5¢ increments.

OPTIONAL EQUIPMENT

MC5900, MC5910 Ten Price Changers

Note: Universal harness #01-12-062-4 must be ordered as a separate item for accessory use.

Removable acceptor for simple field replacement. No tools required. And the same acceptor works for both four and ten price changers—as long as the voltage requirements are the same.

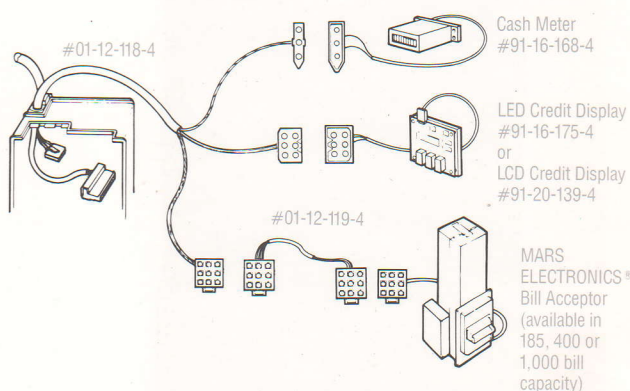

Heavy duty solenoid payout in 3 coins—nickels, dimes and quarters. Fast, accurate change each time, every time.

Electronic escrow—coin for coin, change for a dollar.

Unique exact change feature eliminates constant "Correct Change Only" lights that discourage purchases.

Circuitry for accessories is built-in at no extra cost. It's standard on Mars MC5 Changers.

MC5920AH, MC5930A Four Price Changers

Note: Universal harness #01-12-118-4 is factory installed on four price changers. Bill acceptance capability available on MC5920AH only.
