PRODUCT SPECIFICATION SHEET
MMI Series 280 Hopper Twin "Mini-Changer"

Description: Model 280, the Twin-Mini, is an economy Dollar Bill Changer with one or two bulk loaded coin hoppers enclosed in a secure slimline cabinet designed for compact mounting alongside or between vendors. Attractively styled to match most vending locations, it provides maximum versatility, reliability, and convenience with large coin capacities at a moderate cost.

Dimensions: 36" H x 12 1/2" W x 17 1/2" D

Shipping Weights: 124 lbs. (1 hopper) or 140 lbs. (2 hoppers)

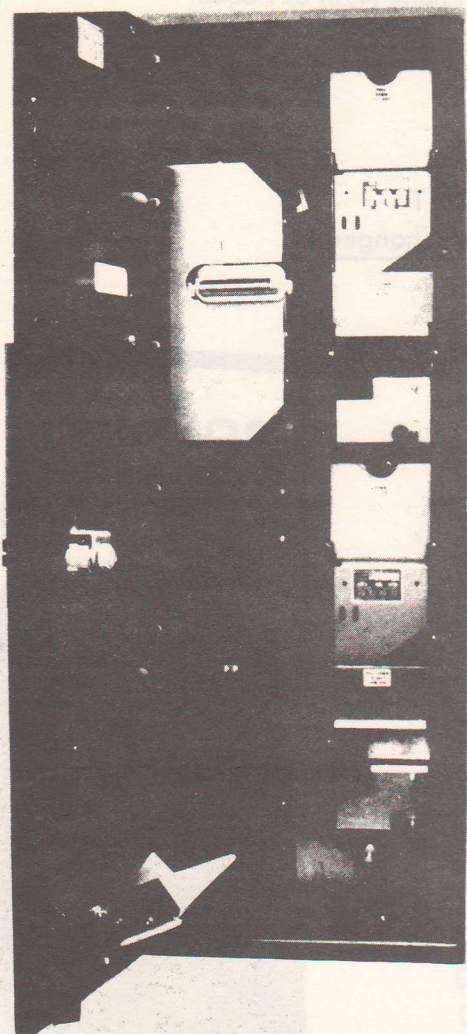

<u>MODEL 281</u>		<u>MODEL 282</u>	
<u>1 Hopper</u>	<u>Capacity,</u>	<u>2 Hoppers</u>	<u>Capacity</u>
4Q	\$400	4Q	\$800
10 D	\$400	3Q - 5N	\$350
20 N	\$100	2Q - 5 D	\$600

Electrical: 115 VAC, 2.7 Amp., 100 to 135 Volt range

Basic Features: New hopper design has a "no-jam" free-fall coin delivery for reliable trouble-free operation. All hoppers handle any coin or token to 1" in diameter with no adjustment required.

Solid State Control: A new solid state hopper control circuit utilizes an infrared gap counter to sense each coin as it falls into an escrow cup. Predetermined coin selections are quickly paid out from the escrow cup when bill is validated. The plug-in printed circuit board uses C/MOS integrated circuits for reliable payout control. LED indicator lights make circuit check-out easy. Programming is by a slide switch or preset module.

Validator: Standard - MMI's dual magnetic and optic two channel optimized for vending. Optionally available: A high security model with added safety feature against manipulation or counterfeits. Validators are interchangeable with all earlier U/L listed models.

Cabinet: Construction is triple wall 14 ga. (.075") steel 1/4" thick security rim interlocks with 12 ga. full hinge paneled door for total security. Styling matches most contemporary banks with brushed aluminum face plate and vending bronze paint. Contoured die cast coin cup for easy one-hand pick-up.

Lock: Protected popout handle actuates a heavy gauge hinge lock which gives full length engagement for maximum vault like protection.

Bill Stacking: Oversize Bill Stacking Box with "see-through" plastic access door is standard equipment.

Optional: An electro-mechanical Bill Stacker which stacks and faces bills in a cartridge for easy counting and deposit is optionally available at extra cost. All hoppers dispense U. S. coins interchangeably.

Dollar coin acceptance available at extra cost; Twin Mini will then take and payout the same programmed coin change for both \$1.00 bills and \$1.00 coins.

Optionally available to order: Model 285

Can accept \$1.00 and \$5.00 bills to payout \$1.00 coin for a \$1.00 bill and five \$1.00 coins for a \$5.00 bill.

A 36" high stand is available to provide 72" bank height, with a lock vault base.
