

MMI'S "HOPPER-MINI" CHANGERS

FOR BOTH \$100 & \$5.00 BILLS

Baked bronze
enamel and
vinyl door
trim standard

\$700 CAPACITY, BULK PAYOUT IN A SLIM SECURE CABINET.

These inexpensive, versatile, rugged bill changers offer high capacity and reliable performance where a single coin will meet change needs. Holding 2800 quarters or tokens, it is ideal for car wash, amusement, laundry and other coin-op location sales. Volumes increase over 20% and profits even more when change for \$1.00 and \$5.00 bills is available.

4 MODELS OFFERED:

191 \$1 only — pays 4 quarters (700 vends)

195 \$1 & \$5 bill — pays 4 or 20 quarters

(T) Token models of above handle industry standard size (.900 x .060) tokens to .984 diameter. Flexible Payout Auto Pulser programmable for \$1.00 = 1 to 15 coins and \$5.00 multiples that 1 to 15 times.

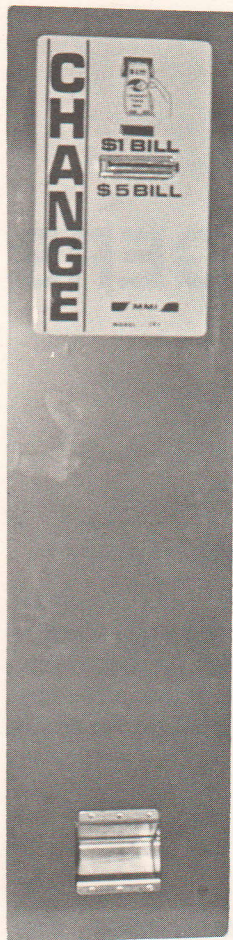

VALIDATORS:

MMI's famous MULTI-SCAN validators detect and reject all counterfeit bills with dependability unequaled in the industry. The \$1.00 model has a selectable "hi-security" switch that lets the owner set the bill acceptance level to take almost all old, ragged, worn or dirty genuine bills.

Both models have on-end, one hand, convenient opto-automatic entry. \$1.00 & \$5.00 units are interchangeable with the \$1.00 only units. Neon indicator blinks "out of coin" when empty. U/L listed component.

BILL STACKER:

Standard equipment on all models is the electro-mechanical stacker. Spring loaded removable cartridge holds 750 bills, compressed and faced for deposit. Resettable and non-resettable counters, an optional extra.

(R) Model
available at
extra cost

COIN PAYOUT HOPPER:

Innovatively simple, the result of 11 years refinement. This field-proven bulk load hopper has only 3 moving elements. A motor driven feed belt, a coin level storage tube, and a rotary solenoid coin shuttle. Clearly visible and easily understood, it can be serviced without special tools or training. Standard models pay out 4 quarters for each actuation. (T) Token models pay 1 coin at a time. A programmable C-MOS pulser sets \$1.00 coin payout and \$5.00 multiplier.

CABINET:

Hopper-Mini's are ruggedly made of 12 ga. and 14 ga. welded steel. MMI's interlocked cabinet design puts a 3/8" thick rim all around the door opening. Registered key locks cam behind welded rim. Replaceable vinyl-faced steel trim panels are standard on all models. A diecast contoured cup assures one-hand coin pickup convenience. Baked vinyl on a rust-proof surface gives long-lasting bronze beauty.

SPECIFICATIONS:

Weight: 100 lbs.
Height: 36 1/4"
Width: 6 1/4"
Depth: 15"
10 ga rear face plate: 9 3/4" x 39 1/2"
