Ardac

Manufactured by Dixie Narco

34000 Vokes Drive, Eastlake, Ohio 44094
(216) 946-3000
FAX (216) 942-1835

Some of the reasons why Ardac gives you more for your money—Greater reliability, longer life, less maintenance, minimum out-of-service time.

1. Reliability—after fifteen years' field experience, RELIABILITY has proven to be one of the greatest assets to our customers.

2. Extremely simple vend mechanism—accessible from the front, operating mechanism for each stack can be replaced on location, by removing 4 screws.

3. Adaptability—Allows double depth 10 oz. and 12 oz. cans and double depth 10 oz. wide-mouth bottles. Can be converted to these packages in minutes on location.

4. Theft—It is not possible to steal thru the delivery port.

5. "Quick-New" Vandal Panels—deter vandalism, 12-gauge galvanized steel panels riveted to cabinet wall and bolted to door side, conceal gasket joint; easily replaced on location, to restore new look if vandals strike.

6. Refrigeration system—complete sealed refrigeration unit and control are easily reached from front of cabinet; oversized evaporator cools rapidly.

7. Foamed-in-place insulation—greater cabinet strength with increased damage resistance, lighter weight, higher insulation efficiency and more vending capacity for a given floor area is provided by polyurethane foamed-in-place insulation.

8. Medallion—is of tough, impact resistant Lexan material.

9. Double security door—two rugged, reinforced doors eliminate joint cracks on front of cabinet to discourage vandals. The interior of the door is designed with a structurally reinforced security vault, which contains the coin changer and coin box. Accessory lock holds doors together, allowing product loading only.

10. Corrosion resistance—top, sides and all external parts of cabinet and door are made of galvanized steel, especially designed to resist ocean spray.

11. Simple patented lockout system—one plug-in relay—permits operation of remaining stacks, even if one stack is inoperative. "Sold-out" lamp lights on inoperative stack.

12. "Neon" lamps—long-lived "sold out" and "correct change" lamps have no filament to break; cut bulb replacement, service costs and "temper" damage to door.

13. Recessed "Pop-Out" handle—fits flush within select panel area; stops vandals from getting into cabinet by breaking former white metal bezel around handle.

**DUAL ADAPTABLES
STACK CAPACITY—12 OZ. CANS**

MODEL DNCB 368/216-8

COLUMN NO:	1	2	3	4	5	6	7	8	TOTAL
TOTAL CAPACITY:	60	60	32	32	32	32	60	60	368
VEND CAPACITY:	58	58	30	30	30	30	58	58	352

CABINET SPECIFICATIONS:

Model	Height	Width	Depth	Approx. Shipping Wt.
DNCB 368/216-8	72	37 1/8	26	695 lbs.

**T-MODEL
STACK CAPACITY—12 OZ. CANS**

MODEL DNCB 501T/280-8

COLUMN NO:	1	2	3	4	5	6	7	8	TOTAL
