COFFEE-MAT "MULTI-BREW"

Another engineering breakthrough for the industry's largest producer of single cup, fresh–brew coffee machines is the multi–brew for the fast food and restaurant operator. Its design now allows these locations to always be able to serve fresh–brewed coffee.

Seconds after pressing the coffee button, the machine dispenses a freshly brewed cup of coffee. It is ideal for slow and peak periods of the day. During peak periods, the timer can be used for brewing anywhere up to 12 cups in a decanter.

The Coffee–Mat Multi–Brew is so simple to load and clean and involves the least amount of service of any piece of coffee making equipment on the market today. It is designed with fea–tures to save time and manpower which is most important since these savings make for increased profits.

It is so simple that the filling and cleaning can be done once a day or once every three hundred cups by any location's employee in the matter of a few minutes.

FEATURES

BREWING SYSTEM: Boiling water system gives better coffee extraction. Each cup in–dividually brewed in seconds. Fully automatic brew cleaning system.

COFFEE HOPPER: Ground coffee dispenser swings out for easy loading.

DRY GROUNDS: Disposable plastic bag for used dry grounds.

WATER SYSTEM: Open tank system. Boiling water at all times. Constant drink temperature regardless of draw. Temperature overload pro–tects water tank. Safety control to prevent water tank flooding.

UNITIZED ASSEMBLIES: Every major assem–bly easily replaced in minutes.

COFFEE FILTRATION SYSTEM: Each cup of uniformly tasting coffee sediment free without the use of filter paper.

CABINET: Easy to clean formica top. Baked on painted cabinet in many standard colors. Formica door available.

AUTOMATIC SANITIZER: The touch of a button – and the insertion of the cleanser – guarantees absolute cleanliness throughout our entire brew system.

SPECIFICATIONS

ELECTRICAL: Operates on 110–115 volts A.C. – Maximum draw 15 amp.

WATER CONNECTION: Simple 3/8" copper tubing connected to cold water line or water storage container for locations without water source.

COFFEE CAPACITY: Six pounds.

CABINET COLORS: Formica and painted cabinet. Stainless work area or all stainless.

DIMENSIONS: Width 15½" – height 59½" – depth 23¾".

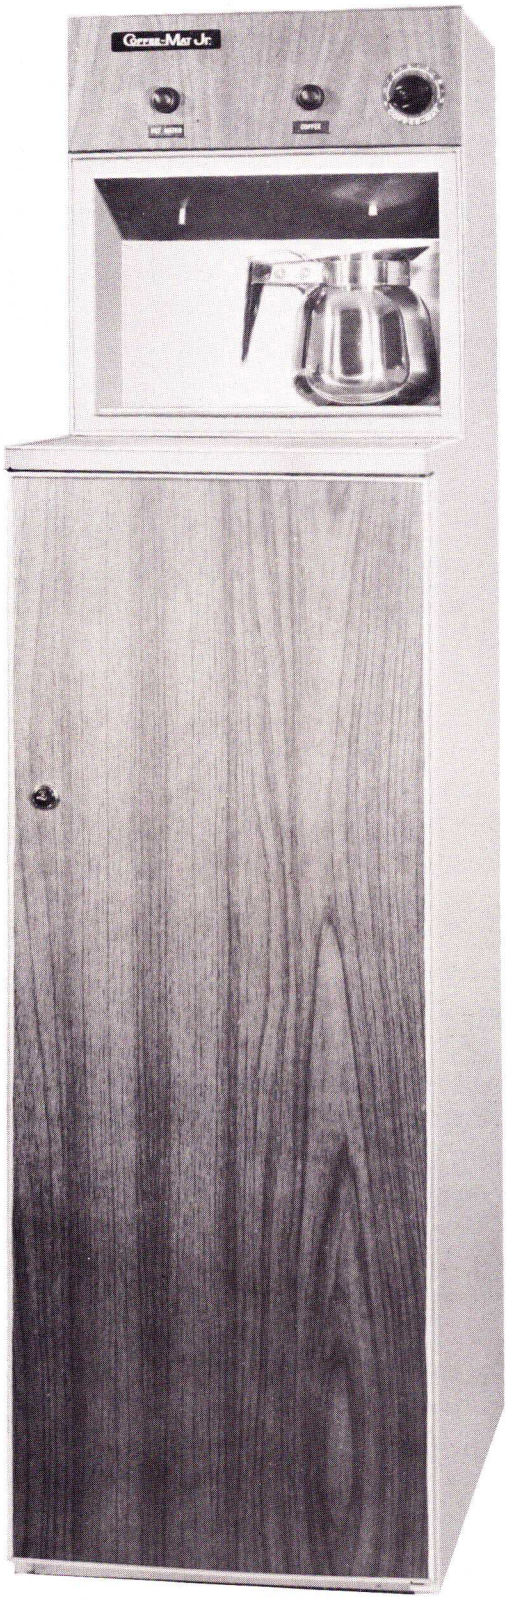

OPTIONS

- ☆ Special paint colors
- ☆ Formica door

DRY GROUNDS — Disposable polyethylene bag-lined container for holding used dry grounds. Fresh brew only.

HEAT-SINK AND VAPOR EXHAUST SYSTEM — Eliminates dusting, moisture and powder build-up. New vapor exhaust housing facilitates removal and cleaning of exhaust system.

LOCK-IN SELECTION SWITCH — Keeps selection in locked position during vending cycle.

WATER SYSTEM — Open system. Boiling water at all times without danger of incident. Constant drink temperature regardless of draw.

UNITIZED ASSEMBLIES — Every major assembly easily replaced in minutes.

STAINLESS STEEL FLOOR — Welded to case. An integral part of the cabinet construction.

ALL FRESH BREW MACHINES ARE AVAILABLE WITH OR WITHOUT FILTER PAPER.

MACHINES WITHOUT FILTER PAPER — Every cup of uniformly tasting coffee brewed through a fine metal screen brew cup.

An automatic brew system cleaner and sanitizer is available to clean the brew cup without removal from the brewer.

MACHINES WITH FILTER PAPER — Every cup of uniformly tasting coffee brewed through fresh filter paper cut from 10,000 drink roll.

AUTOMATIC CLEANER AND SANITIZER — A automatic system that totally cleans and sanitizes the brew system and all the hoses that coffee contacts.
