Easy to understand controls and a multitude of options ensure a more exciting and precise golf game.

Fore! Introducing Skins Game, a character-based, network-ready, interactive golf game that creates the feeling of a live major golfing event.

Golf is more popular than ever. To act on that, Skins Game has been designed to be easy to play but challenging to master in order to attract both novice golfers and pros alike.

Select from two gameplay modes: Extreme and Competitive (True Simulation). Players can refine their golf skills to master each style of gameplay. In Extreme Mode, players can navigate the ball while in the air by adjusting the left, right, top and back spin. And the Power Shot provides the opportunity to achieve "extreme" distance, like a 500 yard drive.

Only Skins Game has the "Troon" license. That means that all of the courses are real courses, recreated using 3D topographic maps to include every detail of the three best Troon courses in America.

Get Skins Game. Take your golf game beyond the tee.

The POWER SHOT gives extra energy to your swing to intensify competition.

Players can enter secret codes on the keypad to enhance gameplay.

With the unique spring loaded joystick, you just pull back, aim and release. The game chooses the best club as the default for the next shot.

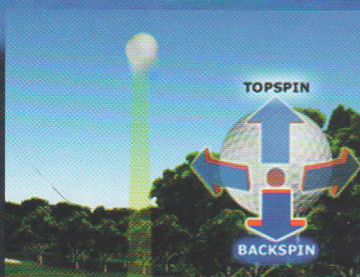

Six unique selectable characters

Simple, detailed screen layout

Use the 911 buy-in for a Mulligan

Ball-in-flight navigation control

Life-like digitized characters
