

IntelliTrac™ Series

Product Information

MARS ELECTRONICS®

Coin Changers/TRC-6200 Single Price

MARSELECTRONICS® TRC-6200 Coin Changer is designed to keep coin inventory at a minimum. With nickel/dime payout, it is equipped for venders without bill acceptors or for bill acceptor locations that do not require quarters for change.

U.S./Canadian or U.S. Only coin acceptance models available.

Dollar Coin Acceptance Option allows acceptance of the SBA \$1 coin and future use of a new U.S. \$1 coin. U.S./Canadian models also accept the Canadian \$1 coin in use today.

Exact Change Option allows the user to insert quarters or dollar coins to make a purchase in an exact change condition.

Escrow Return Option—Standard operation provides escrow-to-vend. The no-escrow option can assure completion of each transaction and prevents the vender from being used as a quarter changer.

Bill Acceptor Capability—Interfaces to all bill acceptors in use today.

LCD Credit Display Option provides visual indication of the value of all money inserted in the machine.

Our fourth generation of electronic coin changers, The IntelliTrac™ Series, represents a milestone in electronic coin acceptance technology. Through the use of intelligent coin tracking, the changer monitors all accepted coins and adjusts its coin acceptance parameters automatically. This self-tracking feature delivers superior coin acceptance over the life of the changer.

All IntelliTrac™ Coin Changers are designed with these features to provide more quality, more reliability, and more value:

Electronic Coin Acceptance for better acceptance of valid coins, better rejection of invalid coins. The acceptor has no moving parts so coins can't jam.

Intelligent Coin Tracking maintains accurate coin acceptance over the life of the changer for extended reliability.

Self Teaching Technology provides token capability for special promotions.

Only Two Moving Parts from insert to payout. Wear and adjustment problems normally associated with moving parts are virtually eliminated.

Solenoid Payout eliminates dispenser jams that result in motor burn-out, downtime.

Modular Design reduces downtime and simplifies repair.

OPTIONAL EQUIPMENT

TRC-6200, TRC-6200H Single Price Changers

Note: Universal Harness #01-12-110-4 is factory installed on Model TRC-6200H only.

TRC-6200C, TRC-6200CH Single Price Changers

Note: Universal Harness # 01-12-110-4 is factory installed on Model TRC-6200CH only.

SPECIFICATIONS

Application

Single price—Escrow to vend machines.

Power Requirements

115 vac $\pm$ 20v, 60Hz
