

IntelliTrac™ Series

Product Information

MARS ELECTRONICS®

Coin Changers/TRC-6800 Single Price

MARS ELECTRONICS® TRC-6800 Coin Changer is the most versatile single price changer of our IntelliTrac™ Series. Equipped with switch-programmable options to customize the changer for your requirements and plug-in capability for all accessories, it is designed to meet your most demanding vending requirements today...and tomorrow.

Accepts U.S./Canadian or U.S. Coins—Can be programmed for any location.

Dollar Coin Acceptance Option assures future use of a new U.S. \$1 coin and allows acceptance of the SBA and Canadian \$1 coin in use today.

Quarter Inventory Option provides for 6 or 69 coins so you can store only the change you need with or without a bill acceptor.

Universal Bill Acceptor Capability—Standardize on one changer regardless of the bill acceptor in use. Provides SMARTCHANGE™ Advanced Logic when used with the MARS ELECTRONICS® Bill Acceptor. Expands change capability to increase bill acceptance for more sales.

Escrow Return Option—Standard operation provides escrow. The no-escrow option can assure completion of each transaction and prevents bill changing for vend prices over \$1.

Designed for any Single Price Application—Switch-programmable escrow to vend/escrow to select feature allows use in either drink or cigarette venders.

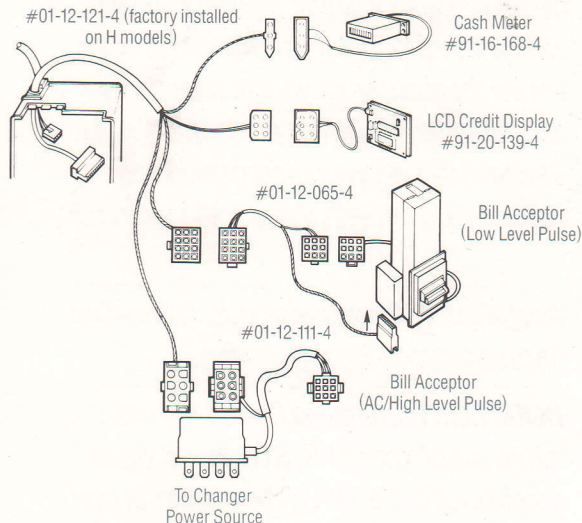

Our fourth generation of electronic coin changers, The IntelliTrac™ Series, represents a milestone in electronic coin acceptance technology. Through the use of intelligent coin tracking, the changer monitors all accepted coins and adjusts its coin acceptance parameters automatically. This self-tracking feature delivers superior coin acceptance over the life of the changer.

All IntelliTrac™ Coin Changers are designed with these features to provide more quality, more reliability, and more value:

Electronic Coin Acceptance for better acceptance of valid coins, better rejection of invalid coins. The acceptor has no moving parts so coins can't jam.

OPTIONAL EQUIPMENT

TRC-6800, TRC-6800H Single Price Changers

Note: Universal Harness #01-12-121-4 is factory installed on Model TRC-6800H only.

IntelliTrac is a trademark of Mars, Inc.

Intelligent Coin Tracking maintains accurate coin acceptance over the life of the changer for extended reliability.

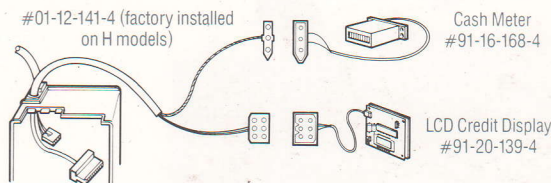

Self Teaching Technology provides token capability for special promotions.

Only Two Moving Parts from insert to payout. Wear and adjustment problems normally associated with moving parts are virtually eliminated.

Solenoid Payout eliminates dispenser jams that result in motor burn-out, downtime.

Modular Design reduces downtime and simplifies repair.

TRC-6800C, TRC-6800CH Single Price Changers

Note: Universal Harness #01-12-141-4 is factory installed on Model TRC-6800CH only.
